

**THE STATE OF
ALICE IN »**

PENNSYLVANIA

**2025 Update on
Financial Hardship**

INTRODUCING ALICE®

ALICE Households

In 2023, based on the Federal Poverty Level (FPL), 12% of Pennsylvania households were defined as being in poverty. Yet this measure failed to account for an additional 28% of the state's households – more than twice as many – that were also experiencing financial hardship. These households are **ALICE: Asset Limited, Income Constrained, Employed** – earning above the FPL, but not enough to afford basic expenses in the county where they live.

Between ALICE households and households living in poverty, **an estimated 40% of households in Pennsylvania were below the ALICE Threshold in 2023**. This rate placed [Pennsylvania 24th](#) among all states and the District of Columbia (with 1st representing the lowest rate of hardship). Households below the Threshold are forced to make impossible choices – like deciding whether to pay for utilities or a car repair, whether to buy food or fill a prescription.

Households below the ALICE Threshold are in every state and county across the U.S. and represent all demographic groups. Workers below the ALICE Threshold often perform the jobs that keep our economy functioning smoothly – they are child care providers, food service workers, cashiers, personal care aides, delivery drivers, and more. Their stories capture the systemic and structural barriers to financial stability, and the struggles and resilience of families experiencing financial hardship.

ALICE Measures

The ALICE measures were developed by [United For ALICE](#) to answer the pressing need for a more accurate picture of financial hardship. The FPL is an outdated instrument that does not consider the wide variation in cost of living by location (except for a slightly higher state-level FPL for Alaska and Hawai'i). As a result, official measures based on the FPL sharply underestimate the true extent of financial hardship in the U.S. And because the FPL is the basis for defining eligibility for many types of public assistance, ALICE households often do not qualify.

Two pillars of the ALICE measures are household costs and income. The [ALICE Household Survival Budget](#) calculates the cost of household basics for each county in Pennsylvania, relying on a wide range of publicly available sources as outlined on page 5. Change over time in the cost of these household basics is tracked in the [ALICE Essentials Index](#).

Household costs are compared to income to determine if households are **below the ALICE Threshold**. For household income, ALICE measures rely on the U.S. Census Bureau's [American Community Survey](#) (ACS) – both household tabulated data and individual data from the [Public Use Microdata Sample](#) (PUMS) records. To provide additional details on household assets, this Report also includes analysis of the [Federal Reserve Board's Survey of Household Economics and Decisionmaking](#) (SHED) (2023).

The data included in this Report spans 2010 to 2023 (latest available). This data does not reflect policy or funding changes that have occurred since, yet it provides an important baseline and context to inform current conversation and decision making.

United For ALICE

Launched in 2009 with a study of financial hardship in one New Jersey county, the nonpartisan [United For ALICE movement](#) has grown to include 35 states and the District of Columbia. With a commitment to [racial and economic justice](#), United For ALICE partners use the ALICE data to give voice to the challenges ALICE households face. Together, they inspire action, strategies, and policies to ensure that all households have enough income for necessities and can save for the future.

In Pennsylvania, this research is brought to you by [United Way of Pennsylvania](#), representing [39 member United Ways](#). Learn more about how the ALICE data is being used to inform strategies and solutions across our partner states in the [ALICE in Action](#) Database.

KEY FINDINGS

Financial hardship: In 2023, of Pennsylvania's 5,308,845 households, 12% (660,390) were below the Federal Poverty Level (FPL), and another 28% (1,465,590) were ALICE – households with income above the FPL, but not enough to afford the ALICE Household Survival Budget for their household composition and location. Combining these two groups, 40% (2,125,980) of households in Pennsylvania were below the ALICE Threshold (Figure 1).

The cost of basics: In Pennsylvania in 2023, the ALICE Household Survival Budget was \$29,964 for a single adult and \$83,544 for a family of four with two adults, an infant, and a preschooler – much higher than the FPL (\$14,580 for an individual and \$30,000 for a family of four). Basic costs varied substantially [by county](#).

ALICE demographics: There were households below the ALICE Threshold across all demographic groups in Pennsylvania. However, due to [systemic racism](#), [ageism](#), [gender discrimination](#), and [geographic barriers](#) that limit many families' access to resources and opportunities for financial stability, certain groups were more likely to experience hardship. These groups included Black households (58% below the Threshold) and Hispanic households (52%); households headed by people under age 25 (66%) or age 65 and older (52%); and single-parent-headed households (72% single-female-headed, 53% single-male-headed).

ALICE in the labor force: Of the 20 most common occupations in Pennsylvania in 2023, 12 paid less than \$20 per hour. And of all workers in the top 20 occupations, 29% lived in households below the ALICE Threshold, with rates as high as 44% for both personal care aides and nursing assistants and 43% for janitors/building cleaners.

Trends in Pennsylvania: Between 2010 and 2023, the total number of households in Pennsylvania increased by 7%, the number of households in poverty increased by 5%, and the number of ALICE households increased by 17%. Behind these overall trends, there were important changes in the numbers of families with children and 65+ households. In addition, housing affordability continued to be a challenge, and basic costs continued to outpace wages in low-wage jobs.

Stable households, stronger communities: If all households in Pennsylvania had enough income to meet their basic needs, not only would households' hardship be eased, but there would be a positive economic impact on the wider community through increased consumer spending and contributions to the tax base.

Figure 1. Forty Percent of Pennsylvania Households Faced Financial Instability in 2023

Sources: ALICE Threshold, 2010–2023; U.S. Census Bureau, American Community Survey, 2023

KEY TERMS

- **ALICE:** Asset Limited, Income Constrained, Employed – households with income above the Federal Poverty Level (FPL) but less than the basic cost of living in their county
- **ALICE Household Survival Budget:** Reflects the minimum costs of household necessities (housing, child care, food, transportation, health care, and technology) plus taxes, adjusted for all U.S. counties and various household compositions
- **ALICE Threshold:** Derived from the Household Survival Budget, the minimum average income that a household needs to afford basic costs, calculated for all U.S. counties
- **Below ALICE Threshold:** Includes households in poverty and ALICE households combined

Data Notes: The income data used in this Report rely on ACS estimates. The ACS is based on a representative sample of housing units and people; therefore, these estimates have a [degree of uncertainty](#). Some data points are geographic averages, others are one- or five-year averages depending on population size (these are reported in the [Data Sheet](#)). Percentages are rounded to whole numbers, sometimes resulting in percentages totaling 99% or 101%. ALICE analysis includes households regardless of work status, as employment is fluid and most households have members who are working, have worked, are out on disability, or are looking for work. ALICE analysis includes families and roommates but does not include people who are unhoused or living in group quarters (such as college residence halls, skilled nursing facilities, and military barracks).

BASIC COSTS: THE ALICE HOUSEHOLD SURVIVAL BUDGET

To capture the reality of household costs across Pennsylvania, the **ALICE Household Survival Budget** is calculated for all counties and various household compositions. This budget reflects the minimum cost to live and work in today's economy. (See the Budget Overview on page 5 and use the [ALICE Budget and Income Status Tool](#) for custom budgets by household composition and location.)

Figure 2 illustrates the mismatch between costs, wages, and official measures of financial hardship. It includes ALICE Household Survival Budget costs for a Pennsylvania family with two adults, an infant, and a preschooler (totaling \$83,544 annually) and the combined full-time wages of two common Pennsylvania occupations – a personal care aide (over 210,000 statewide) and a stock worker/order filler (nearly 105,000 statewide), totaling \$64,690 annually. Figure 2 also compares costs and income to three governmental measures of financial hardship:

- **The Federal Poverty Level** (FPL): The FPL relies on an [outdated methodology](#) for household costs; it does not account for cost-of-living differences across the continental

U.S., or within states; and it is adjusted by the Consumer Price Index, which underestimates inflation in essential costs (as demonstrated by the [ALICE Essentials Index](#)). In 2023, the [FPL](#) was \$14,580 for a single adult and \$30,000 for a family of four.

- **The Supplemental Poverty Measure** (SPM): First published by the U.S. Census Bureau in 2011, the SPM is based on the costs of food, clothing, shelter, and utilities. In 2023, the SPM threshold for a renter household with two adults and two children in Pennsylvania was \$32,501.
- **Area Median Income** (AMI): The AMI is the midpoint of income distribution within a geographic area (half of households earn more, half earn less). Percentages of AMI are used for federal housing assistance; very low-income households earn less than 50% of AMI, the typical threshold for Section 8 eligibility. AMI is based on income, not costs, so it does not capture whether households can afford basic expenses. In Pennsylvania in 2023, for a four-person household, 50% of AMI was \$47,700 – higher than the FPL and the SPM, but still well below the Household Survival Budget.

Figure 2. Basic Costs Exceeded Wages of Common Jobs and Official Measures of Hardship
Annual Budget, Wages, and Official Measures of Financial Hardship, Family of Four, Pennsylvania, 2023

Note: *Personal care aides* monitor the condition of people with disabilities or chronic illnesses and help them with daily living activities. *Stock workers/order fillers* receive, store, and issue merchandise, materials, equipment, and other items from stockrooms, warehouses, or storage yards, and may operate power equipment to fill orders.

ALICE Household Survival Budget, Pennsylvania		State Average Costs, 2023		
	Budget Item Description and Sources (See Methodology for more details)	Single Adult, Age 18–64	Single Adult, Age 65+	2 Adults, 1 Infant, 1 Preschooler
Housing	110% of Fair Market Rent (FMR) for an efficiency, one-bedroom, or two-bedroom apartment (based on family size), including utilities, adjusted in metro areas using Small Area FMR Source: U.S. Department of Housing and Urban Development (HUD) Update: As of 2023, based on HUD's new FMR policy , housing costs are calculated using 110% of FMR to more accurately reflect the rental market. Small Area FMR is used in metro areas, where rents are higher than 110% of FMR. In prior years, costs used standard FMR and were adjusted in metro areas using ACS housing costs. To avoid reporting artificial rent decreases, 2022 rents are used if higher than 2023 rents.	\$829	\$829	\$1,127
Child Care	Cost for registered Family Child Care Homes for infants (0–2 years), preschool-age children (3–4 years), and school-age children (5–12 years) Source: Pennsylvania Office of Child Development and Early Learning	\$0	\$0	\$1,557
Food	USDA Thrifty Food Plan by age, with county variation from Feeding America Sources: Feeding America; U.S. Department of Agriculture (USDA)	\$489	\$450	\$1,326
Transportation	Operating costs for a car (average daily miles by age, cost per mile, license, fees, and insurance), or public transportation where viable Sources: AAA, Federal Highway Administration, National Association of Insurance Commissioners (NAIC) (car); Consumer Expenditure Survey (CEX) (public transportation) Update: The source for insurance premiums changed from the Zebra to NAIC in 2023; rates are similar and updated more frequently. Note: In some counties, 2023 transportation costs were lower than in the 2022 budget, largely due to a decrease in both gas prices and average miles traveled.	\$389	\$326	\$924
Health Care	Health insurance premiums based on employer-sponsored plans plus out-of-pocket costs for households with \$40,000–\$69,999 annual income by age, weighted with the poor-health multiplier. For the ALICE 65+ Survival Budget, cost of Medicare Parts A and B, out-of-pocket costs, plus average out-of-pocket spending for the top five chronic diseases as reported by CMS. Sources: Centers for Medicare & Medicaid Services (CMS); CEX (health); Medical Expenditure Panel Survey (MEPS) Note: In many counties, employee contributions to health care plans were lower in 2023 than in 2022, per sources above.	\$172	\$540	\$660
Technology	Basic broadband internet at home and a smartphone plan with unlimited data for each adult in a household Sources: Consumer Reports; USTelecom	\$86	\$86	\$116
Miscellaneous	Cost overruns estimated at 10% of the budget, excluding taxes, to cover one-time unanticipated costs within the other categories	\$197	\$223	\$571
Taxes	Federal payroll taxes (Social Security and Medicare) and federal, state, and local income taxes owed on household income to cover the Survival Budget, as well as the federal Child Tax Credit and the Child and Dependent Care Tax Credit Sources: Internal Revenue Service; Tax Foundation; calculated for United For ALICE by the Federal Reserve Bank of Atlanta (FRBA) Note: 2022 tax data was revised by FRBA for this update.	\$335	\$401	\$681
Monthly Total		\$2,497	\$2,855	\$6,962
Annual Total		\$29,964	\$34,260	\$83,544
Hourly Full-Time Earnings Needed to Support the Household Survival Budget*		\$14.98	\$17.13	\$41.77

*Represents the earnings needed at 40 hours/week, 50 weeks/year to support the annual total, including taxes.

FINANCIAL HARDSHIP BY DEMOGRAPHIC GROUP

There are households below the ALICE Threshold across Pennsylvania, and they reflect a wide range of demographics and household types (Figure 3). However, some groups had a higher rate of financial hardship in 2023, a result of factors including [systemic racism](#), [ageism](#), [gender discrimination](#), and [geographic barriers](#) that limit many families' access to resources and opportunities for financial stability:

- **Age:** In 2023, the youngest and oldest households had the highest rates of financial hardship: 66% of households headed by someone under age 25 and 52% of households headed by someone age 65 and over lived below the ALICE Threshold in Pennsylvania. By comparison, rates were lower for those in their prime working years, with 33% each of households headed by people age 25–44 and age 45–64 living below the Threshold.

- **Race/ethnicity:** Rates of financial hardship differed substantially by race/ethnicity in Pennsylvania. In 2023, the largest number of households below the ALICE Threshold were White (1,499,713), making up 37% of all White households. Black households were the next largest group below the Threshold (315,691), yet they made up 58% of all Black households. There were also 176,380 Hispanic households below the Threshold, making up 52% of all Hispanic households. Other, smaller groups also had high rates of hardship: 46% of households headed by someone of Two or More Races, 53% of American Indian/Alaska Native households, and 56% of Native Hawaiian/Pacific Islander households were below the Threshold. Asian households had the lowest rate (33%).
- **Household type:** In 2023, 36% of single or cohabiting households without children headed by someone under age 65 – the most common household type – were below the ALICE Threshold in Pennsylvania. Among families with children, 32% were below the Threshold. And longstanding disparities in financial hardship by household type remained: 72% of single-female-headed families and 53% of single-male-headed families were below the Threshold, compared to 15% of married-parent families.
- **Location:** In 2023, the rate of financial hardship was similar in rural (42%) and urban (40%) areas. By county, the percentage of households below the Threshold was highest in Forest County at 53% and lowest in Chester County at 29%. Hardship varied even within counties: For example, in Bucks County, the percentage of households below the Threshold ranged from 6% in ZIP code 18925 (Furlong) to 57% in ZIP code 19021 (Croydon).

INTERACTIVE ALICE DATA

ALICE data is available online by [race/ethnicity](#), [age of householder](#), [household type](#), [county](#), [county subdivision](#), [census designated place](#), [ZIP code](#), and [legislative district](#). See all available geographies and more on the [ALICE Mapping Tool](#).

Figure 3. Financial Hardship Varied Substantially by Demographic Group

Key Demographic Groups, Pennsylvania, 2023

	Total	Below ALICE Threshold	<div> <div></div> Poverty <div></div> ALICE <div></div> Above ALICE Threshold </div>		
ALL HOUSEHOLDS	5,308,845	2,125,980	12%	28%	60%
AGE					
Under 25 Years	175,379	115,018	35%	31%	34%
25 to 44 Years	1,637,323	546,918	12%	21%	67%
45 to 64 Years	1,877,619	616,096	11%	22%	67%
65 Years and Over	1,618,524	847,948	12%	40%	48%
RACE/ETHNICITY					
American Indian/ Alaska Native	8,024	4,242	17%	36%	47%
Asian	168,432	55,425	8%	25%	67%
Black	546,841	315,691	18%	39%	42%
Hispanic	336,378	176,380	14%	39%	48%
Native Hawaiian/ Pacific Islander	1,356	763	16%	40%	44%
Two or More Races	232,790	106,081	11%	34%	54%
White	4,083,643	1,499,713	7%	29%	63%
HOUSEHOLD TYPE					
Married With Children	854,910	124,308	5%	10%	85%
Single-Female-Headed With Children	305,940	220,434	40%	32%	28%
Single-Male-Headed With Children	116,503	61,815	19%	34%	47%
Single or Cohabiting, Under 65, no Children	2,412,968	871,475	12%	25%	64%
RURAL/URBAN					
Rural	612,452	257,620	13%	29%	58%
Urban	4,696,393	1,868,360	12%	27%	60%

Note: The groups shown in this figure are based on head of household and overlap across categories. Within the race/ethnicity category, all racial categories except Two or More Races are for one race alone. Race and ethnicity are overlapping categories; in this Report, the American Indian/Alaska Native, Asian, Black, Native Hawaiian (includes other Pacific Islanders), and Two or More Races groups may include Hispanic households. The White group includes only White, non-Hispanic households. The Hispanic group may include households of any race. Because household poverty data is not available for the American Community Survey's race/ethnicity categories, annual income below \$15,000 is used as a proxy. Counties are defined as rural or urban based on the USDA's designation of metropolitan or non-metropolitan at the census tract level. Counties with 50% or more of the population in metropolitan tracts are designated as urban; those with 50% or more of the population in non-metropolitan tracts are designated as rural.

Sources: ALICE Threshold, 2023; U.S. Census Bureau, American Community Survey, 2023

ALICE IN THE LABOR FORCE

Workers below the ALICE Threshold increasingly bear the brunt of economic change and uncertainty as the workforce shifts to incorporate new [technology and automation](#) and as employers increase [reliance on non-standard work arrangements](#) – like [hourly paid work](#), [part-time employment](#), and [gig work](#). These [arrangements](#) make it easier to [reduce work hours or cut employment](#) altogether when the economy ebbs (which happened to a large degree during the COVID-19 pandemic) and expand them when demand increases (which happens seasonally for a range of industries such as hospitality, recreation, and retail sales).

In 2023, of the 20 most common occupations in Pennsylvania as reported by the Bureau of Labor Statistics (BLS), 12 still paid less than \$20 per hour. And of the workers in these 20 occupations, 29% were living in households below the ALICE Threshold. Occupations with the largest share of workers in households below the Threshold included personal care aides (44%), nursing assistants (44%), janitors/building cleaners (43%), cashiers (42%), and cooks (42%) (Figure 4).

Figure 4. A Large Share of Workers in the 20 Most Common Occupations Were Below the ALICE Threshold

Labor Characteristics, Most Common Occupations, Pennsylvania, 2023

Most Common Occupations	Total Employment (BLS)	Percent of Workers Below ALICE Threshold (ACS PUMS)	Median Hourly Wage (BLS)
Personal Care Aides	213,020	44%	\$13.94
Laborers and Movers, Hand	150,470	33%	\$18.84
Delivery Drivers/Sales Workers	148,580	27%	\$20.93
General and Operations Managers	145,770	9%	\$47.66
Registered Nurses	144,100	9%	\$39.80
Fast Food and Counter Workers	139,950	40%	\$13.36
Retail Salespersons	134,160	29%	\$14.51
Cashiers	126,400	42%	\$14.40
Office Clerks	122,170	23%	\$19.62
Customer Service Representatives	112,850	24%	\$20.00
Janitors and Building Cleaners	112,580	43%	\$16.93
Stockers and Order Fillers	104,930	34%	\$17.16
Cooks	87,580	42%	\$15.35
Waiters and Waitresses	81,500	36%	\$14.28
Secretaries and Administrative Assistants	81,320	20%	\$20.20
Elementary and Middle School Teachers	79,880	10%	\$36.84
Orderlies and Psychiatric Aides	69,910	36%	\$19.65
Administrative Support Supervisors	67,840	17%	\$29.74
Nursing Assistants	65,220	44%	\$18.53
Sales Representatives, Wholesale and Manufacturing	65,100	9%	\$41.97

Note: BLS = Bureau of Labor Statistics; ACS PUMS = American Community Survey Public Use Microdata Sample. This figure includes all workers with income from these occupations (full-time, part-time, and freelance). [ALICE Threshold status](#) is determined by comparing workers' total household income to the ALICE Household Survival Budget for their household composition and location.

Sources: ALICE Threshold, 2023; Bureau of Labor Statistics–Occupational Employment Statistics, 2023; U.S. Census Bureau, American Community Survey, PUMS, 2023

The Labor Landscape

Full- and part-time work: Though the majority of adults in Pennsylvania were working in 2023 and most households had at least one worker, only 22% of the population age 16 and over had the security of a full-time job with a salary. Of those in the labor force (blue bars in Figure 5), nearly two-thirds (65%) were paid hourly and/or worked part time. Workers who are paid by the hour are more likely to have fluctuations in income due to [schedule changes and variable hours](#), and they are [less likely to receive benefits](#), such as health insurance, paid time off, family leave, or retirement plans.

Unemployment: In 2023, 3% of Pennsylvanians age 16 and over were unemployed – not currently working but looking for work in the prior four weeks (light blue bar in Figure 5). The

unemployment rate for workers below the ALICE Threshold in different parts of the state is often notably higher than the official rate. To see more data on workers below the ALICE Threshold in your community, visit [UnitedForALICE.org/ALICE-EVD](#).

Out of the labor force: Another 37% of Pennsylvanians age 16 and over were out of the labor force in 2023 (gold bars in Figure 5), including those who were retired (19%) and those who were out of the labor force for other reasons, such as disability, health issues, caregiving responsibilities, or student status (18%). For more data on the labor landscape and occupations in your state, visit [UnitedForALICE.org/Labor-Force/Pennsylvania](#).

Figure 5. Less Than One-Fourth of People Worked Salaried, Full-Time Jobs
Labor Status, Population Age 16+, Pennsylvania, 2023

Note: Data for full- and part-time jobs is only available at the national level; these national rates (approximately 50% of full-time workers and 82% of part-time workers paid hourly) have been applied to the total state workforce to calculate the breakdown shown in this figure. Full-time represents a minimum of 35 hours per week at one or more jobs for 48 weeks per year.

Sources: Federal Reserve Bank of St. Louis, 2023; U.S. Census Bureau, American Community Survey, 2023

SPOTLIGHT ON SAVINGS AND ASSETS

When households are not earning enough to cover basic costs, their ability to save for emergencies, retirement, or other future needs is greatly hindered. According to the [Federal Reserve Board's Survey of Household Economics and Decisionmaking](#) (SHED), in 2023, respondents below the ALICE Threshold in the [Middle Atlantic Census Division](#) (which includes Pennsylvania) were far less likely than those above the Threshold to have savings that could cover three months of expenses in the event of an emergency (41% vs. 74%), or to have retirement assets (47% vs. 91%). Additionally, non-retirees below the Threshold were less likely to say that their retirement savings plan was on track (12%, vs. 40% above the Threshold).

TRENDS IN PENNSYLVANIA

Over the last decade, the number of ALICE households in Pennsylvania has been on the rise as wages have failed to keep up with the cost of household basics. When prices increase faster than wages, purchasing power decreases. This is especially challenging for ALICE households that are already struggling to make ends meet.

Between 2010 and 2023, the total number of households in Pennsylvania increased by 7%, the number of households in poverty increased by 5%, and the number of ALICE households

increased by 17%. During this period, households below the ALICE Threshold in Pennsylvania consistently made up between 37% and 41% of all state households (Figure 6).

Most recently, from 2022 to 2023, the number of ALICE households decreased, contrary to the general trend for this group. It will be important to track whether this trend continues or shifts direction in the coming years.

Figure 6. The Number of ALICE Households Decreased With Most Recent Update, Yet has Trended Upward Over Time

Number of Households by Income, Pennsylvania, 2010–2023

Note: The gray dashed trend lines in this figure highlight the general direction of the point-in-time data for the years shown. These lines indicate whether the numbers of ALICE and poverty-level households have been generally increasing, decreasing, or remaining flat. The ALICE trend line is statistically significant at $p < 0.002$; however, the Poverty trend line is not statistically significant, and caution should be used when making predictions.

Sources: ALICE Threshold, 2010–2023; U.S. Census Bureau, American Community Survey, 2010–2023

Families with children: Following the national trend, the number of households with children under age 18 declined in Pennsylvania from 2010 to 2023, falling 5%. However, the number of these households below the ALICE Threshold held steady in Pennsylvania, while decreasing nationwide. There were also differences in Pennsylvania by family type: The total number of married-parent and single-female-headed households decreased, while the number of single-male-headed households increased. And the number of households below the Threshold decreased for single-female-headed families, but increased for married-parent and single-male-headed families.

Older Americans: With the [aging of the Baby Boomer generation](#), households headed by people age 65 and over were the fastest-growing age group in Pennsylvania (up 32% between 2010 and 2023). They were also the age group with the most substantial increase in the number of households below the ALICE Threshold (reaching 52% of all 65+ households in 2023).

Wages: Across the country, [wages increased from 2018 to 2023](#), growing fastest in 2022. In 2023, wage growth slowed yet remained above pre-pandemic levels. But while wage increases help households cover costs, they have generally not been

enough to make up for years of falling behind. For example, in 2010, [retail sales workers](#) – selling goods ranging from clothes to appliances to cars – earned a median wage of \$10.52 per hour (\$21,870 annually for full-time work) in Pennsylvania. This worker’s household fell \$8,058 short of the annual Household Survival Budget for a family with one adult and one school-age child (\$29,928). By 2023, the median wage for this occupation increased by 38%, to \$14.51 per hour (\$30,180 annually, full-time). Yet the annual Household Survival Budget for one adult and one school-age child also grew (to \$43,332), leaving these essential workers \$13,152 short of covering basic costs – even further behind than they were in 2010.

Housing: [Housing costs continued to be a challenge](#) for households below the ALICE Threshold. In 2023, 26% of all renter households below the Threshold in Pennsylvania paid 30% to 49% of their income on housing. An additional 43% paid half of their income or more. **Combined, 69% of all renter households below the Threshold in Pennsylvania were rent burdened** (paying 30% or more of their income on rent and utilities), up from 66% in 2021. For homeowners below the Threshold, 52% were housing burdened (paying 30% or more of their income on homeowner costs, including mortgage payments, utilities, and homeowner’s insurance), up from 48% in 2021.

STABLE HOUSEHOLDS, STRONGER COMMUNITIES

Households below the ALICE Threshold play a vital role in their communities – as neighbors, family members, and civic participants. They also contribute to their local economies – as workers, consumers, and taxpayers. Yet these households, more than 2.1 million in Pennsylvania, did not earn enough to cover basic costs in 2023.

This is not a new problem. The share of households below the ALICE Threshold in Pennsylvania has varied only slightly for more than a decade, persisting through shifting economic conditions and the COVID-19 pandemic, and across political administrations.

This is not a small problem. In Pennsylvania, 40% of all households were below the ALICE Threshold in 2023. These households face [day-to-day challenges](#) of trying to make ends meet, while also being more vulnerable to the impacts of crises, both widespread (i.e., natural disasters, public health emergencies) and personal (from unexpected car repairs to major health issues). And while isolated interventions can help ameliorate some of these challenges, the core issue remains: There is a wide gap between households' income and what they need to make ends meet.

But what if all households had enough income to cover their basic needs? In Pennsylvania, bringing all households to the ALICE Threshold would have taken \$46.7 billion in 2023. Working to meet this gap through coordinated effort and investment from multiple sectors, including government, nonprofit, business, and philanthropy, would change the trajectory for Pennsylvanians who are struggling financially – and it would also benefit the state economy.

This matters for all of us. Households below the ALICE Threshold are more likely to [spend than to save](#) additional income, so this income would largely go back into the economy as households spend to cover costs and pay additional taxes.

Increased spending in the local economy has a [multiplier effect](#). Mark Zandi, Chief Economist at [Moody's Analytics](#), [estimates economic multipliers](#) for additional household income spending on food (1.57), utilities (1.27), and other necessities (1.42). For instance, every dollar [spent on food](#) spurs an additional 57 cents in business growth in the retail, agriculture, trucking, and rail freight industries.

There are also economic multipliers for the additional income taxes that households below the ALICE Threshold would pay.

Zandi estimates economic multipliers for tax revenue spent on aid to state and local governments (1.27) and transportation infrastructure (1.23), meaning that every dollar households below the Threshold pay in additional taxes would fuel even more in state and local investments.

** See Figure 7 for additional details/sources related to the benefits of meeting basic needs.*

Beyond these economic contributions, there are cascading benefits of meeting basic needs in Pennsylvania (Figure 7). If all households are on a more solid financial footing, communities can look beyond crisis spending and poverty alleviation toward broader community well-being. For example, funding that went toward emergency housing or food assistance could be redirected to create more affordable housing and locally grown food systems for the long term. Funding could also be used to enhance opportunities for civic engagement, arts, and recreation. Together, these investments can improve physical and mental health and overall quality of life – not just for ALICE families, but for entire communities and the state as a whole.

Figure 7. Cascading Benefits of Meeting Basic Needs

If households have sufficient income for...	Benefits for ALICE Households	Benefits for the Wider Community
 Safe, Affordable Housing	Improved physical and mental health through safer environments and reduced stress ; improved educational performance and outcomes for children; greater stability for household members; a means to build wealth and racial equity for homeowners	Expanded and updated housing stock , reduced systemic housing inequities ; lower health care costs ; reduced homelessness ; increased opportunities for jobs and more money spent in local communities
 Quality Child Care and Education	Increased labor force participation , lifetime earnings and retirement security for women ; health benefits for children , school readiness , improved educational attainment and graduation rates ; improved performance in higher education ; higher lifetime earnings	Reduced racial/ethnic inequalities in learning and development ; positive health, education, and economic outcomes for children and families ; stronger community economies ; more homebuyers and higher property values through availability of quality child care
 Adequate Food	Decreased food insecurity; improved health (especially for children and adults age 65 and over); decreased likelihood of developmental delays and behavioral problems in school	Lower health care costs ; improved school and workplace productivity; less spending on emergency food services ; greater equity by gender, race/ethnicity and immigration status
 Reliable Transportation	Decreased transportation insecurity ; improved access to work/job opportunities , school and child care , health care and social services, food/retail markets , and support systems (friends, family, faith communities)	Improved air quality and reduced gasoline consumption/carbon emissions ; increased economic opportunity through returns on investment ; a more diverse labor market ; decreased income disparities ; more integrated neighborhoods
 Quality Health Care	Better mental and physical health (including increased life expectancy); improved access to preventive care ; fewer missed days of work and school ; decreased need for emergency services ; lower share of income spent on health	Decreased health care spending and strain on emergency services; reduced racial/ethnic disparities in insurance coverage and access to care ; fewer communicable diseases; improved workplace productivity ; decreased wealth-health gap ; better outcomes during health crises
 Reliable Technology	Improved access to job opportunities ; expanded access to health information and telemedicine services ; increased job and academic performance	Closing the “ digital divide ” in access to technology by income; increased economic development ; increased connectivity and social inclusion that helps reduce social, economic, and political disparities
 Savings	Ability to withstand emergencies without impacting long-term financial stability; greater asset accumulation over time (e.g., interest on savings ; ability to invest in education, property, or finance a secure retirement)	Less spending on public services to cover basic needs like health care, food, and housing — especially for unexpected or emergency expenses

We All Have a Role to Play

Our vision is a country where ALICE families not only have sufficient income to afford the basics but can also save and invest in their future. This is a vision not only for ALICE, but for the nation as a whole. The information presented in this Report can help stakeholders prioritize economic prosperity for all. We all have a role to play:

Community members:

- Raise awareness of ALICE through ALICE [news](#) and [videos](#) or [share your experiences](#)
- [Connect with your local United Way](#) for advocacy, support, and volunteer opportunities
- Advocate for the continuation of current government datasets (e.g., American Community Survey, Fair Market Rents). Consistent data over time is crucial for informed decision-making, effective policy implementation, and accountability.

Policymakers and nonprofits:

- Explore ALICE by district using the [Legislative District Tool](#)
- [Map ALICE by location](#) to pinpoint need and identify gaps in community resources
- Use interactive tools from the Federal Reserve Bank of Atlanta (which use ALICE budgets), including the [Policy Rules Database](#) and the [Career Ladder Identifier and Financial Forecaster](#)
- See examples of [policies, practices, and programs](#) United For ALICE partners have implemented using ALICE data

Employers:

- [Implement strategies](#) that support the well-being and retention of ALICE workers while also boosting engagement, productivity, and the bottom line
- Advocate for community resources that support your employees – from affordable housing to quality child care

ABOUT UNITED FOR ALICE AND OUR PARTNERS

The State of ALICE in Pennsylvania: 2025 Update on Financial Hardship is brought to you by [United Way of Pennsylvania](#) – representing [39 member United Ways](#) – in partnership with [United For ALICE](#), a driver of innovative research and action to promote financial stability for **ALICE**® (Asset Limited, Income Constrained, Employed) households. With a commitment to [racial and economic justice](#), United For ALICE and United Ways across Pennsylvania share this work with foundations, government, corporations, and other nonprofits to inform policy and promote positive change for ALICE households.

The grassroots ALICE movement, developed by United Way of Northern New Jersey, has spread to 35 states and the District of Columbia. Learn more about the ALICE movement [here](#).

To create the ALICE Reports, our [team of researchers](#) works with [Research Advisory Committees](#) composed of experts from our partner states. This work is guided by our rigorous [methodology](#), which is updated biennially with experts from across our Research Advisory Committees.

Director and Lead Researcher: Stephanie Hoopes, Ph.D.

ALICE Research Team: Andrew Abrahamson; Ashley Anglin, Ph.D.; Catherine Connelly, D.M.H., M.A.; Jessica Fernandez; Dana Isaac; Victoria Mutuku, M.A.
